

## **Active Learning and Study Strategies A Kurzweil 3000 Guide for Teachers**

Are your students able to:

- Go beyond the simple decoding of text to organizing and learning the information in the text?
- Master information from reading and keep it in long-term memory?
- Consolidate the ideas from their reading and write about those ideas?

**They can if they learn active learning and study strategies!** Providing direct, systematic instruction in active learning and study strategies to your students gives them the tools they need to be successful, active learners.

This new guide – from Kurzweil Educational Systems and Joan Sedita, M.Ed., a leading expert and nationally recognized speaker and teacher trainer in the areas of reading, study skills and learning disabilities – offers suggestions for teaching active reading and study strategies, and for using Kurzweil 3000 features to apply these skills.

***Active Learning and Study Strategies*** covers the following topics and strategies that you can teach your students:

- Pre-reading skills, including skimming, developing a pre-reading vocabulary list and constructing a pre-reading main ideas list.
- Question asking and answering skills.
- Vocabulary development through direct and indirect instruction.
- Highlighting while reading.
- Constructing notes and developing study guides.
- Summarizing.
- Writing and proofreading.
- Test preparation and test-taking skills.
